Important Coastal Information

Coastal environment is extremely harsh on finish and materials. Doric Products strongly recommends that any building situated within 5 kilometers of the coast or affected by direct coastal breeze, should only use Polesium™, aluminium or 316 grade stainless steel hardware. Doric Products recommends that all its products exposed to harsh climatic conditions should be washed and cleaned every month with a mild detergent to stop salt build up and all cylinders should be lubricated with a suitable graphite powder as Doric Products will not replace inappropriately placed hardware.

On discovery of any defect in goods, the customer must immediately notify Doric Products in writing of such defect. The customer must not carry out any remedial work to allegedly defective goods without first obtaining the written consent of the company to do so.
